› MANUFACTURING

› WAYS IN WHICH WE ALREADY HELP

Our services create a safer working environment and assist in the continuous production process – essential when working in a cost-sensitive, machine-intensive environment.

Safetykleen is part of the solution of reducing an automotive plant's carbon footprint. Our machines are designed to reduce waste and our waste oil collection and hazardous waste management services eliminate waste build up.

We work alongside production managers, procurement specialists, health and safety managers, operators and compliance teams ensuring our services dovetail with the requirements of all departments.

› WAYS IN WHICH WE ALREADY HELP

Safetykleen is trusted by F1 teams to help their engineers deliver outstanding component performance in environments where reliability, speed of service and maintenance demands all run high.

Our range of services include:

- Specialist automotive cleaning equipment
- A waste oil collection and recycling service
- A waste management service specifically tailored to the waste streams generated by the automotive trade
- Spray equipment cleaning

› TYPICAL AUTOMOTIVE APPLICATIONS

› PARTS WASHERS

We have developed parts washers to suit the demanding requirements of the automotive trade, designing in waste reduction, energy saving and speed of cleaning.

› KLEENCUT

Puts an end to machine inefficiencies and reduces or eliminates skin irritation and the respiratory effects of bad odours which result from the build-up of tramp oils (non-soluble oil based contaminants).

› SPRAY EQUIPMENT CLEANING

Manual and automatic cleaning equipment. Ideal for use in paint workshops where vehicle components are sprayed against tight schedules.

› WASTE MANAGEMENT

We are experts in hazardous and non-hazardous waste management. Whether it is brake pads, aerosols, absorbent waste, waste coolant, batteries, fluorescent tubes, inceptor waste and paint tins.

› BRAKE CLEANER

A unique two stage cleaning process which dampens, traps and removes dust particles, leaving brakes or clutches clean and dry, eliminating costly aerosols and disposal concerns.

› WASTE OIL COLLECTION

Whether it is a single drum or full tank of hydraulic oil, waste engine oil or oil from industrial processes, Safetykleen aims to respond within 1 working day – providing a reliable service to the whole industry.

› WHAT WE OFFER

› PARTS WASHING

The widest range of manual and automatic parts washers serviced under a flexible agreement that gives total peace of mind.

› SPRAY EQUIPMENT CLEANING

Manual and automatic machines ensure spray equipment remains in prime condition to deliver the perfect finish every time.

› SPECIALIST CLEANING SERVICES

A range of service agreements and equipment for cleaning and maintenance, including brake cleaners, de-rusting and cutting fluid conditioning.

› WASTE MANAGEMENT

Hazardous and non-hazardous waste management; taken to the highest possible level required by the Waste Framework Directive.

› WASTE OIL COLLECTION

From small drums to large tanks, our nationwide fleet of tankers and trucks collects waste engine and industrial oil.

› CONSUMABLES

A range of products that enhance workshop safety and efficiency, delivered direct from the fleet of Safetykleen service vehicles.
