A SERVICE PLAN TAILORED
TO MEET THE NEEDS OF THE
AUTOMOTIVE TRADE

SAFELY CLEANING YOUR ENVIRONMENT

WWW.SAFETYKLEEN.CO.UK

> CAREPOINT SERVICE PLAN

> EXPERTISE

Our expert Carepoint Consultant works with you to tailor a service plan to meet your specialist cleaning and waste management requirements and provides advice on the legislation which has an impact on your business.

> SERVICE

The Carepoint Service Plan is a cost effective way to benefit from the wide range of services Safetykleen can provide to garages, bodyshops and paint workshops.

>> COMPLIANCE

We help you provide evidence to customers and compliance authorities that you are adopting best environmental practices in line with the Waste Framework Directive.

> HOW YOUR CONSULTANT CAN HELP

- ✓ Assess your operations (e.g. car services being done, how much waste and oil needs to be collected etc.)
- ✓ Work up a detailed proposal to suit your specific business needs
- ✓ Work with our professional service representatives to provide you with a tailored service
- ✓ Regularly review with you the services we provide, so we can meet any changes in requirements

> COMPREHENSIVE SERVICE PLAN

We recommend the most suitable parts washer, specialist cleaning service and spray gun cleaner which you then choose to include in your plan.

We discuss the hazardous wastes you want us to collect, including your waste oil collection requirements. We then put together a comprehensive schedule and pricing plan to suit your business.

> REASSURING YOUR CUSTOMERS

All motor vehicle servicing waste is required by law to be handled professionally to prevent pollution. Safetykleen utilises waste recycling or re-use as the first choice disposal option and minimises the costs passed on to your customer.

By choosing Carepoint you can confidently inform customers and authorities that any waste oil, brake fluid, petrol, diesel, antifreeze, oil filters, batteries, tyres and paint products have been dealt with using best environmental practices. This can help justify any costs you choose to pass directly to customers.

› MACHINE SERVICES

Machine services you may wish to include:

- Aqueous Parts Washers
- Solvent Parts Washers
- Spray Equipment Cleaning
- Brake Cleaner
- De-rusting

› WHY SAFETYKLEEN?

- ✓ One simple monthly bill
- ✓ Replace equipment and change service terms to meet your changing needs
- ✓ Everything included in the price: machine, maintenance, waste management, fluid changes, environmental charges, all the legal paperwork, labelling and waste reporting
- ✓ Fast, responsive, localised service delivered by a nationwide network of branches

› WASTE MANAGEMENT

Waste to include (not limited to list below):

- Machine Solvents
- Waste Tyres
- Batteries
- Antifreeze
- Brake fluid
- Waste Paint
- Waste Thinners
- Oil Filters
- Rags
- Petrol and Diesel Waste

› WHY SAFETYKLEEN?

- ✓ One service visit for all your waste reduces disruption and simplifies administration. Environmental charges and all compliance paperwork included
- ✓ Colour-coded safe and secure storage containers
- ✓ Pre-scheduled collections will avoid waste build-up

› WASTE OIL COLLECTION

- We have a dedicated fleet of waste oil tankers and a network of transfer stations across the country
- We collect: waste engine oil and many other types of oil
- Whether it is a single drum or a full tank, we provide a pick-up service to meet your requirements

› WHY SAFETYKLEEN?

- ✓ There really is no other waste oil collection company that is in your area more often than SafetyKleen
- ✓ We aim to respond to all small or large waste oil requests within 1 working day of receiving your instructions. For scheduled customers, we simply collect waste oil at regularly reviewed intervals
- ✓ We deal with all the compliance paperwork and take the greenest possible approach to processing your waste oil, keeping you compliant

› WHAT WE OFFER

› PARTS WASHING

The widest range of manual and automatic parts washers serviced under a flexible agreement that gives total peace of mind.

› WASTE MANAGEMENT

Hazardous and non-hazardous waste management; taken to the highest possible level required by the Waste Framework Directive.

› SPRAY EQUIPMENT CLEANING

Manual and automatic machines ensure spray equipment remains in prime condition to deliver the perfect finish every time.

› WASTE OIL COLLECTION

From small drums to large tanks, our nationwide fleet of tankers and trucks collects waste engine and industrial oil.

› SPECIALIST CLEANING SERVICES

A range of service agreements and equipment for cleaning and maintenance, including brake cleaners, de-rusting and cutting fluid conditioning.

› CONSUMABLES

A range of products that enhance workshop safety and efficiency, delivered direct from the fleet of Safetykleen service vehicles.
