

# kleencut™

**Reduce metal working fluid costs** through continuous oil separation

## PRODUCTIVITY

With cleaner fluid sumps less time will be consumed removing and replacing fluid from the reservoir

## QUALITY

Cleaner process fluid leads to longer tool life as less contamination is present to damage any equipment

## COMPLIANCE

Kleencut delivers reduced waste volumes therefore assists companies deliver their waste management programs

Includes patented technology

- Extends cutting fluid life – reduces waste associated costs
- Reduces downtime for bath cleaning and fluid replacement
- Helps maintain item finish quality
- Compact size – less floor space
- Prevents bacteria and eliminates odours

SPECIFICATIONS	
Overall Dimensions (HxWxD)	955 x 550 x 480 mm
Suction Lift	3 metres (max)
Separator Tank Volume	18 litres
Waste Oil Collection Drum	25 litres
Power Requirements	230-240 / 110 V
Sump Capacity	200 litres

## TYPICAL APPLICATION

Safetykleen's Kleencut™ system constantly conditions your fluid reservoir reducing waste volumes and creating a healthier working environment. Kleencut removes tramp oils from:

- |                 |  |
|-----------------|--|
| • Coolant       | • Coolant / cutting fluid              |
| • Cutting fluid | • Contaminated aqueous wash detergents |

## TYPICAL MACHINE COMBINATIONS

Kleencut is ideally suited to a wide range of applications and can be used alongside a variety of metal working processes including:

- |                |                         |
|----------------|-------------------------|
| • CNC Machines | • Aqueous parts washers |
| • Cutting      | • Milling               |
| • Drilling     | • Turning               |

## WHY CHOOSE KLEENCUT?

### HEALTH & SAFETY

Reduces or eliminates skin irritations and dermatitis. Avoids asthma, bronchitis and other respiratory problems. Eliminates bacterial-generated nausea and sickness

### INNOVATION

Unique service for clean, efficient and odour free cutting oil

### PERFORMANCE

Extends fluid life saving cost of replacement fluid minimising downtime for fluid change out and reducing the need for waste removal

### ENVIRONMENTAL

Contained waste system eliminates spillages. Collected waste is processed in line with the Waste Framework Directive, enhancing your company's environmental credentials, through recycling and waste minimisation

Supported by our specialist chemistry and Fully Serviced Machine program.
