

KLEENWIPE

> REUSABLE WIPES

kleenwipe™

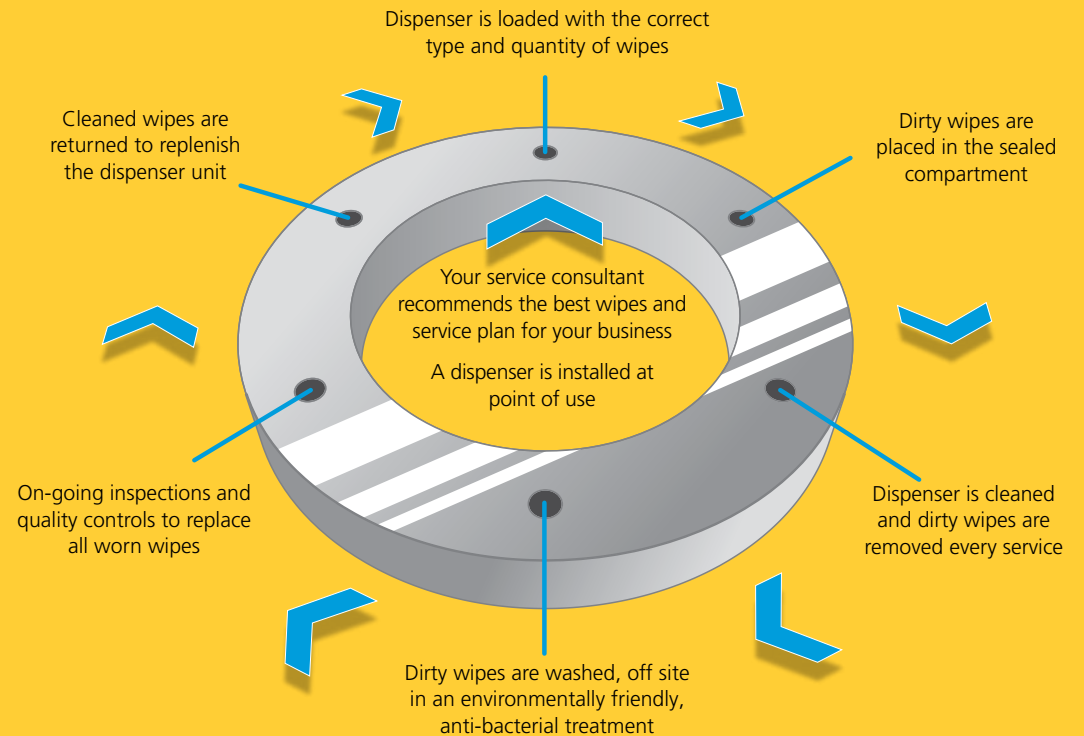

Our **kleenwipe** service helps you maintain a clean and safe working environment, as well as demonstrating a commitment to best environmental practice.

- All-inclusive service: wipes supplied, washed, quality inspected and re-supplied for re-use
- Convenience: dispensers are located at the heart of your operations
- Professional cleaning: comprehensive range to meet specific industrial applications
- Waste prevention solution: top of waste framework directive
- Continual improvement: supporting ISO 14001 accreditation

YOUR SERVICE CYCLE

We determine your exact cleaning requirements and recommend the type and quantity of wipes for your needs. We also work with you on the location of the Kleenwipe dispensing units and ensure the service plan is exactly right for your business. The laundry process meets stringent quality, environmental and health and safety standards (ISO9001, ISO14001 and ISO18001).

QUALITY WIPES – SUPERIOR CLEANING

Highly absorbent and exceptionally resistant wipes ensure a clean and efficient working environment – ideal for cleaning tools and processing equipment.

SIMPLE, COST-EFFECTIVE CONVENIENCE

Compared to disposables there is no investment in stock, storage or removal. We supply the dispenser and manage the service cycle – your service payment is based solely on what you use.

BETTER ENVIRONMENTAL SOLUTION

A service designed to reduce your carbon footprint: Fewer raw materials and less energy is used compared to disposable wipes. The cleaning process uses low energy technology and all water is recycled.

UNIQUE WIPES DISPENSER

An ergonomically designed and easy to use dispenser. The proximity of units, close to an operative's workstation, means minimum disruption and overall wipe usage is reduced. While carefully considered working heights allow for easy accessibility of the dispensing and disposal system.

Dispenser for clean wipes

Hatch automatically closes and is lockable

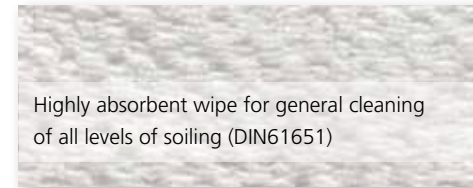

Safe storage of dirty wipes

TAILORED RANGE OF WIPES

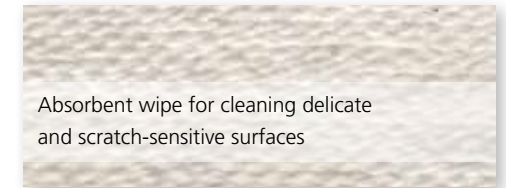

Our range of wipes means there is a professional cleaning solution for tools and plant equipment in almost all industries. Your *kleenwipe* consultant will advise on the best wipe for your specific applications – depending on both the surface to be cleaned and the types of contaminant.

kleenabsorb

Highly absorbent wipe for general cleaning of all levels of soiling (DIN61651)

kleenfine

Absorbent wipe for cleaning delicate and scratch-sensitive surfaces

COLOUR-CODED BY INDUSTRIAL APPLICATION

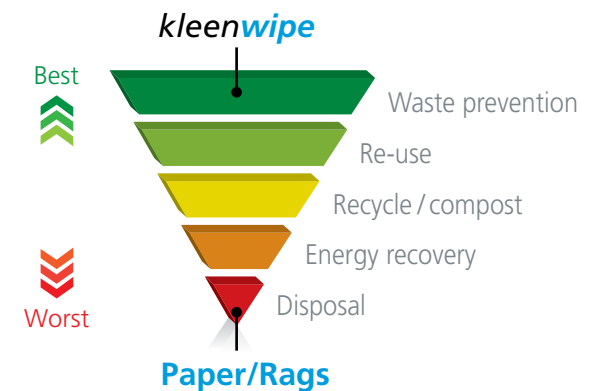

Red is ideal for removing oil and grease in industry and garages

Blue is ideal for removing oil and grease in metalworking industries

WASTE HIERARCHY

Ensuring total compliance to all relevant environmental and health and safety legislation.

The Kleenwipe service is designed with waste prevention at its core, this is the highest level required by the Waste Framework Directive. Wipes are produced for continuous re-use and we consider every aspect of the cleaning process.

THE BENEFITS OF OUR WIPES AND THE KLEENWIPE SERVICE

The wipes are designed to withstand heavy usage and repeated cleaning whilst retaining their shape and absorbency. We manage the cleaning process so all contaminants are removed. As part of a rigorous inspection process, we dispose of any worn wipes and these are replaced.

› WHAT WE OFFER

› PARTS WASHING

The widest range of manual and automatic parts washers serviced under a flexible agreement; that gives total peace of mind.

› SPRAY EQUIPMENT CLEANING

Manual and automatic machines ensure spray equipment remains in prime condition to deliver the perfect finish every time.
