## › SERVICES FOR THE CUTTING AND METAL WORKING INDUSTRY

### › WHERE WE CAN HELP

- ✓ Ensuring coolant and cutting oil baths adhere to Health & Safety laws.
- ✓ Cleaning of machine cutting tools to remove debris, extend tool life and increase cutting efficiency.
- ✓ Degreasing - essential to the preparation of surfaces for painting, welding, hardening, bonding and electroplating.
- ✓ Cleaning of spray equipment used in the manufacture of metal cutting machines.
- ✓ Part of a comprehensive cleaning and planned maintenance programme for tooling and machinery.

### › HOW WE ALREADY HELP

Efficiencies in machine cutting processes are essential to funding ever-changing technological demands. Integration of automated systems is predicted to continue to expand not only in large companies, but also within smaller operations.

The Safetykleen service plays an important role in improving production efficiencies and forms a critical part of a comprehensive maintenance programme. This allows our clients to focus on their specific business expertise and remain competitive.

Ask your sales representative for more details on what we offer:

### › CLEAN, EFFICIENT AND SAFE

We supply cutting machine cleaning technology to engineering and metalworking industries.

We assist in reducing waste, improving output and creating a safer working environment. Our unique Kleencut Service prolongs the life of cutting tools and machine parts. It enhances production quality, reduces waste and prevents the health risks associated with tramp oil build up.

### › WIDE RANGE OF SOLUTIONS

Our expertise and breadth of range means we supply the ideal cleaning solution for your exact requirements. Our aqueous and solvent based cleaning solutions deal effectively with a wide variety of organic and in-organic contaminants, as well as varying component sizes, quantities and physical properties.

## › TYPICAL CUTTING AND METAL WORKING APPLICATIONS

### › PARTS WASHERS

Manual and automatic machines for intricate and heavy components – small or large batches. Perfect cleaning performance on both geometric defined and undefined cutting tools. Aqueous and solvent solutions at service intervals to meet demand.

### › SPRAY EQUIPMENT CLEANING

Manual and automatic cleaning equipment. Our range of safe and efficient paint cleaning equipment assists machine and tool shop operations throughout the production process ensuring the perfect finish to machine tools and components.

### › KLEENCUT

Puts an end to machine inefficiencies and reduces or eliminates skin irritation and the respiratory effects of bad odours, which result from the build-up of tramp oils (non-soluble oil based contaminants).

### › WASTE MANAGEMENT

From small barrels to large tanks we remove and recycle waste oil from industrial processes. We also offer a comprehensive waste management programme and advise on industry best practice.

### › KLEENWIPE

Our best environmental practice absorbent wipe service. We provide two professional cleaning wipes for metalworking industries. We process all wipes with an environmentally friendly anti-bacterial deep clean to remove all oil and grease. We also ensure that metal swarf is removed.

## › WHAT WE OFFER

### › PARTS WASHING

The widest range of manual and automatic parts washers serviced under a flexible agreement that gives total peace of mind.

### › SPRAY EQUIPMENT CLEANING

Manual and automatic machines ensure spray equipment remains in prime condition to deliver the perfect finish every time.

### › SPECIALIST CLEANING SERVICES

A range of service agreements and equipment for cleaning and maintenance, including brake cleaners, de-rusting and cutting fluid conditioning.

### › WASTE MANAGEMENT

Hazardous and non-hazardous waste management; taken to the highest possible level required by the Waste Framework Directive.

### › WASTE OIL COLLECTION

From small drums to large tanks, our nationwide fleet of tankers and trucks collects waste engine and industrial oil.

### › KLEENWIPE

A comprehensive wipe supply and cleaning service. Combining a cleaner and safer working environment with a commitment to environmental best practice.

### › CONSUMABLES

A range of products that enhance workshop safety and efficiency, delivered direct from the fleet of Safetykleen service vehicles.
