

safetykleen

paintkleen™

Comprehensive
cleaning service
to achieve the
**perfect paint
finish**

PRODUCTIVITY

Combined manual and automatic machines deliver operator efficiency for cleaning solvent or water based paint spray guns

QUALITY

Clean rinse function ensures all traces of paint removed to prevent colour contamination

COMPLIANCE

Used thinners is recycled and all waste paints removed in line with current legislation

Automatic M782

Manual M777

TYPICAL APPLICATION

Cleaning of spray guns between colour changes is critical to the success of any paint job. The Paintkleen range includes machines and chemicals that deliver productivity and quality demanded by leading paint shops everywhere. The Paintkleen range is ideally suited to cleaning uncured paints including:

- Solvent based
- Water based
- Primers
- Top coats

TYPICAL COMPONENTS

- Gravity fed spray guns
- Suction fed spray guns

WHY CHOOSE PAINTKLEEN?

PERFORMANCE

Automatic wash to remove most of the paint and then finish and inspect manually

PRECISE

Clean rinse to finish gives outstanding results every time and avoids cross contamination

ENVIRONMENTAL

Waste thinners are removed and recycled to reduce your VOC's and minimise your waste volumes

REDUCED WASTE

Low volume fluid usage ensures more cleaning cycles can be completed before the fluid needs to be replaced

- Choice of solvent or water based chemistry to match your paint requirements
- Manual and automatic wash functions deliver high quality cleaning
- Suitable for conventional HVLP gravity or suction fed guns

	Manual - M777	Automatic - M782
Overall Dimensions (HxWxD)	1270 x 730 Ø mm	1200 x 600 x 450 mm
Paint contamination / cleaning solvent	Thinners based or aqueous	
Power Requirements	5.5 - 6.5 bar	
Liquid supply	25 litres	

Supported by our specialist chemistry and Fully Serviced Machine program.
