inside

PRODUCTIVITY

Wash spray guns automatically and manually at the same time to double throughput

QUALITY

Clean rinse function ensures all traces of paint removed to prevent colour contamination

COMPLIANCE

Innovative design reduces operator exposure to cleaning chemicals

TYPICAL APPLICATION

Cleaning of spray guns between colour changes is critical to the success of any paint job. The Paintkleen super series provides manual and automatic cleaning with an innovative patented lift system for the automatic washer. This offers a market leading space for manual cleaning at the same time within a compact machine footprint. Ultimate spray gun cleaning is achieved, delivering the productivity and quality demanded by leading paint shops everywhere.

Easy to operate, fully compliant with current legislation and SATA and Anest Iwata approved. The Paintkleen range is ideally suited to cleaning uncured paints including:

- Solvent based
- Water based

TYPICAL COMPONENTS

- Gravity fed spray guns
- Suction fed spray guns

- Machine designed for fast servicing, reducing downtime, improving performance and consistency
- Choice of chemistry for solvent or water based paints
- Manual and automatic wash functions deliver high quality cleaning
- Suitable for conventional HVLP gravity or suction fed guns

WHY CHOOSE PAINTKLEEN?

PERFORMANCE

Automatic wash to remove the paint, then option to rinse finish and inspect manually

PRECISE

Clean rinse to finish gives outstanding results every time and avoids cross contamination

ENVIRONMENTAL

Waste thinners are removed and recycled to reduce your VOC's and minimise your waste volumes

REDUCED WASTE

Low volume fluid usage ensures more cleaning cycles can be completed before the fluid needs to be replaced

	Auto / Manual - M713
Overall Dimensions (HxWxD)	1750 x 780 x 590 mm
Paint contamination / cleaning solvent	Thinners based or aqueous
Power Requirements	5-6 bar air
Liquid supply	25 litres

Supported by our specialist chemistry and Fully Serviced Machine program. Paintkleen super series is designed to be self-cleaning in operation. Rinse and air dry ensures equipment is spotless ready for use.

Machine designed for serviceability as part of its DNA. Safetykleen's Fully Serviced Machine program ensures machines are replaced and fully re-furbished at agreed intervals, with minimal downtime
